## About the author

I grew up in Cincinnati Ohio I'm 27 and I'm a poet and I didn't know it

## summary

Cloud 10

A Date With Pain

Stuck in Place

Smile where people frown

When it pass

Stand up

Trash

The spark between us

The love in the world

Dreams are real

Twist and turns

We dare not

3p!sdn umop

Lighter than feathers

You know not what\'s good

But Really

We May Fall

we do on our own

As The Color Disappear

What you see

lies seem to sway

Deeper then the endless sea

Embrace

form of light

Transcends Time

Hot as the flame

suffocate

Afraid Of The Unknown

## Cloud 10

Im on cloud 10 because 9 was packed again  
I feel higher then authority and use the clouds as my land  
I miss her like a target but she catches with her hand  
I'd go so hard you'd think it was a plan  
She say im hot i say you want to be my fan?  
I want to take control like movies on demand  
If you want to be my girl then i want to be your man  
If its a game to you ....well.. Do you think im playing?  
Its remedial i mean i think im just saying  
Im laying on the bed and on top is where your laying  
You have me on cloud 10 because 9 was packed again

## A Date With Pain

Im In love with pain  
I feel like there is nothing more to gain  
I feel like I'm going insane  
love was knocking but I was afraid  
of the rain  
so I'm caught by this chain  
image stuck in my brain cells dying decaying  
hope someone is praying  
but it hurts like the truth  
deep as the roots  
I can't lifts my legs I'm stuck on you  
I'm stuck like glue  
but still I can't cry  
live by a lie  
we use to take off but I fell out the sky  
the pain feels good is this wasn't goodbye  
after years I'm still shy  
this pain is syfy  
I never knew love can make you feel life is WiFi  
reality's not real  
so is this how it feels  
this pain feels like a eel  
but bites like a shark  
attack for the kill  
and go straight for the heart  
but when its over in time it may heal  
after you've fallen apart

## Stuck in Place

I'm on a mission from planet superstition across the distance where no one listen

searching for what is missing I'm on a mission from the heart it's tripping over beats from all the tension it's probably just a phrase your on my mind like we're surfing brain waves it's not that great could be but I'm stuck in place so what do I say no how do I feel could I repair this heart keep the fake from the real I want you surprised like lets make a deal I can tell your polished astonishing and I felt by any means I think I need help I'm on a mission and when your not here I turn to myself so open up the main door to your heart we were in love from the start let our love fly but never depart

## Smile where people frown

Mr president of new things  
This is how i hang  
This is my gang  
No....this...is ...um.. my rang  
Where im shooting for the heart because the head is small  
Dont have to beat up your ears just knock your feet off  
Im walking to tall for us all we at the same level .....so blast off  
All i wanted was a little bit of your dove  
So i can was insanity and fly with love  
I love the remedy.....thats us  
Nothing will ever break our trust  
Its a shame my people down we have a world to turn around  
Im addicted to the truth lets make a smile where people frown  
I hear the cry for help lets fly how dont touch the ground  
Love will heal us i know this is true so love love love now

## When it pass

Where there was old I now see new  
where there was love I once saw you  
where there was us there's only the sky's  
we fell out the sky's when we lost our minds  
where there was hate I now am blind  
where there was love you once saw mine  
when it pass I lost my past  
the future was our first but what happened to last  
so I lost my ... I mean I gained my wings  
when I followed it seems to come to you to follow my dreams

## Stand up

Stand up don't fall for love  
I just want to take your heart from the skys above  
What? to the limit? There's no limit to love  
Stand up and speak with hugs  
We stick together like mating bugs  
Dinking your soul by the the jugs  
Kisses so lovely and un heard of  
Stand up and hear my plea  
Love is pretty much waisted and giving for free  
It hurt when you took the love from me

## Trash

I wish I didn't have something and I want to give it back who ever gave it to me didn't say with what it came attached with and it's a burden carrying it around no one cares where's it's at

Who ever gave me feelings can you please get your trash the last thing I want to feel is how it feels when it left

Love isn't real or just doesn't last

Pain stays forever good times barley pass

Joy was a girl I knew but didn't know the vast

Sorrow I ran into bringing up the past

These feelings come and go and I wish they didn't cast

Such grief in my life this isn't just a test if I have zero tolerance for feelings maybe then I'll be blessed

Who ever gave me feelings can you please get your trash

## The spark between us

The bond between us and what we going through  
Life is hard when you're a molecule  
The smallest constituent next to the atom dude  
I mean to make me I guess it takes two  
The spark between us and inside would hurt you  
We share our protons it feels good inside boo  
When we split we'll have explosive thing we go through  
We can never be destroyed only become something new

## The love in the world

I feel good I can almost touch the sky  
Life feels great when your walking tall  
I swear if I fall I'll die I never been so high  
If the Havens open I'll surely fall  
With the love in the world is the reason I fly  
I'm love to those who need it most so give me a call  
I don't always know the answer but together we will try  
Everything is better when you not talking to a brick wall

## Dreams are real

I use to want to dream but what about  
I thought you might help get rid of all the doubt  
I realized that dreams can't be lived without  
The way we escape reality therefore we dream  
But do they run out  
Why run from them when we could be a team  
Sometimes I want to shout  
If dreams are real well I dreamed of you more than I can count

## Twist and turns

Let's take a ride threw my troublesome mind  
Where the dreams are dark and light is hard to find  
To where I hold my thoughts truly one of a kind  
This ride could be dangerous  
Hold my hand lets take our time  
Promise you won't tell the world what you'll find  
If you're feeling uncomfortable give me a sign  
We'll be out faster then you can say fine  
Unpleasant twist and turns all kinds of rips and lines  
Ahh wait I see why I'm sorry let's go to the start  
We're going to the brain not a trip through my heart

## We dare not

I live in a world where its love that's on top  
It's like candy canes and gum drops  
With maple rain and lemon tops  
Every time I see you sugar my heart just stop  
Then beat fast faster just might pop  
My thoughts just wondering and on you they dropped  
Thinking if I had a choice between do and not  
Cold and hot  
A written language we dare not speak the plot  
But I guess that's life when you  
Program alot

## 3p!sdn umop

I feel like my life is 3p!sdn umop  
I feel like when I expect happiness I can only frown  
Crazy things in my life when your not around  
And it's flipped my life 3p!sdn umop  
I can't forget nothing I really wasn't meant to have  
you had me confused but the confusion also made me glad  
I can't give up on my future you're my future past  
come on baby girl just let me past  
every reason for the season you can call me L  
you know I'm into all the pleasing like a carousel  
look in your eyes so baby can't you really tell  
you're my country and treason that would never fail  
your my boat when we out we're setting sail  
your my bell I ring you just so I can hear you yell  
I love you boo I promise I do so please don't leave  
my life 3p!sdn umop

## Lighter than feathers

Where are your thoughts  
and are they filled with whats and who  
if you were to ask me  
ill say now and you  
or maybe now an later  
we could put them together  
im on one like the news on the weather  
i feel a ton of thoughts  
thats lighter than feathers  
where are your thoughts  
are they stuck in a tree  
running from thinking  
or made it to free  
where would they be  
as if dazzled come see  
oops i found your thoughts  
and they were stuck to me

## You know not what's good

I use to be so lonely  
And misunderstood  
I use to dream about money  
To do what I wish I could  
If you claim you know me  
You know not what's good  
I'm glad my lovely  
Just like I know I would

## But Really

Unless you me you'd never understand  
How my mind work you'd need a better hand  
A better angle for answers I ran  
You can not know enough when your brain absorb like sand  
Shapes like water brakes like land  
Forms like lava cunning like a plan lol  
But really to understand me it's you to understand

## We May Fall

When dreams may come and go  
People may come and leave  
I just want you to know  
That it's unconditionally  
We may fall  
We may raise  
We may fight  
We may bleed  
At the end  
We may see.....  
that you were always apart of me....

## we do on our own

Where is everyone or are we truly alone

If you do exist want you come sing me a song

Let's go for a ride don't care how long

Where is everyone while I'm stuck here at home

I want to learn how to make us strong

But at the same time we could definitely destroy ourselves like we do on our own

Maybe the hate in our hearts have to depart before you take us along

Maybe you'll take us apart throw us in carts rip out my guts break all my bones

Where is everyone what are you doing even with all the humans here on Earth why do I still feel alone

## As The Color Disappear

Looking at your pictures but the color isn't there  
It's the different shades of grey  
That makes the picture seem clear  
It seemed so far away but closer than I fear  
Couldn't see far as if I'm looking in a mirror  
Looking for a reason to make you seem near  
Because when you far away is when I miss you being here  
Looking in despair as the color disappear  
I should face forward but still looking towards the rear  
In order to move along i need to face my fears  
I bet a new picture would put a end to all these tears

## What you see

I couldn't lift life but all the weight just faded  
now im lifting so high i guess im elevated  
life's a book but mines not illustrated  
i could tell you about it but you just sit there trying to debate it  
i don't really care what you see  
my mind brain storms instantaneously  
spontaneously it rains  
unbearably is the pain  
verbally is my name mentally insane  
i joke to laugh off the pain  
why the loudest voices are the ones in fame  
no shame on they game  
just sometimes being happy speak louder then shame

## lies seem to sway

People come in close yet so far  
I keep my head in the clouds like a star  
People say they know how I feel  
Is this true or is the people talking not real  
People say you have no other way  
I'm clearly so far from what people say  
Living by my analogy every single day  
At least I know by me lies seem to sway  
So I guess I stand and watch people float away

## Deeper then the endless sea

I've been watching you  
And you've been watching me  
I want to show you how its ment to be  
Love deeper then the endless sea  
Way wiser then we can see  
Stand up and take my hand  
We can build our own land  
Close your eyes count to three  
We make it easy to be  
Free

## Embrace

We must not forget to forgive but forgive and forget  
We must not live in fear where we the people conquests  
Then there's alot we never knew as we learn everyday  
With information lies seems to sway  
The day seems to decay  
We must face our fears embrace is the way  
Love isn't the absence of hate but in the presence with the will to turn away

## form of light

We try to be good to be humble but some still fight  
Not all but its a difference between wrong and right  
Dim the light lets talk so we might like this dreadful night  
Is it human to war with peace spreads darkness an awful sight  
The universe is bigger than your thoughts of life  
Love is a connection just as darkness is a form of light

## Transcends Time

Love is a funny thing even though it's just a line  
You can feel it or is that simply in your mind  
Love is a word but the impressions it leave behind  
Can hunt your dreams  
show you things that can even transcends time  
We tell people we love them but whats this i find  
when daily task hit me your on my mind your one of kind  
Stop to look at your pictures you have online  
Smile and leave the whole world blind  
twisted like a plot when you have my thoughts in a bind falling until i drop my world feeling dark  
when the sun doesn't shine  
As sweet as it may be i dont think we'd ever be a team  
Then back to reality as it may seems  
Wishing you were more then a daydream

## Hot as the flame

Where is my brain it's my fault I feel this way I don't know why in my mind I twist and play this same weak symptom every day

And I still fall when I know better so it's really me to blame it burns hot as the flame held close to my brain it fries and attention I can't pay it's hard for me to say goodbye ..... But I guess it has to be this way

**suffocate**

People come in close yet so far  
I put my head in the clouds like a star  
it often seems so hard but I really can't understand people thus far  
people say they know how I feel  
this can't happen I want the real deal  
i want to wish upon a little star  
never knew how close we are  
Never thought it would go this far  
flying until my wings break  
If this not real I know we're not fake  
I didn't know how much it take  
drowning in this frozen lake  
im dying I might just suffocate

## Afraid Of The Unknown

I stand in the rain so none can see my heart has turned to snow  
All these imprints left on thee as I continue to go with the flow,  
Love wasn't me from what I've been shown  
Embracing your inner darkness to balance the light is the key just maybe I'm afraid of the unknown
