Best friends

My best friend always makes me smile even when I'm down
We laugh till we drop
We play until the end of the day
I'm there for her, she's there for me
We'll be best friends to the end
Our friendship will never finish
We think the same thoughts
We dream the same dreams
I love my best friend

So what?

You didn't clean your room!

So what?

You didn't do your homework!

So what?

You didn't eat all your veggies!

So what?

You didn't do your piano practice!

So what?

You didn't feed the cats!

You didn't change the baby's nappy.

So what!

You didn't lock the car!

Oops!

London

The weather changes every day,
from rain to hail and nice to great.

There's lots of wonderful places to go,
like Big Ben, Tower Bridge, The London Eye and more.

So come on down,
don't hesitate!

It's loads of fun,
you don't have time to wait!

money

Lots and lots throughout the world
they make more every day

Many people find it hard
just to stay away

But there's more to life than owning things

if you give the money to a desperate person
then you could make their day

Money doesn't last forever
so when spending it
try to be clever

School

Friends as funny as friends can be
Teachers as great as winning the lottery
That's what school is to me
Making friends with someone
Playing wonderful games
That's what makes school so fun
We need school like birds need wings
But one thing makes me love school even more
Being able to go there 5 days a week

Seaweed

Green, wet and practically useless.

Waving and wriggling on the bottom of the ocean.

Fish swimming in and out like it's not there.

But there's much more, much much more to seaweed than it may seem.

Seaweed.

What if...

What if...

people could fly?

What if...

mobile phones didn't exist?

What if...

humans and animals swapped?

What if...

life is just a dream?

What if...

these things will happen in the future?

Who knows!

6 ways to view the moon

The miraculous moon is a coin the colour of gold,
gracefully glistening next to the scorching sun in the vast nothingness of space.
It is a colossal thumbprint that has been stamped onto the sunless ink pad of space by a mighty
giant,
along with thousands upon thousands of miniature stars.
The moon is a bright, glistening smile,
shining elegantly down onto the wondrous Earth.
It is a droplet of clear, sapphire water,
floating majestically like a leaf on the murky pond of never ending space.
The moon is a shard of transparent glass,
shattered aimlessly across space in a million minute pieces.
It is a tremendous eye,
watching over earth like a mother over her child.

Wolf

Night prowler
